NOAH JENSEN AND STEPHANIE TRENEER

BOARD PARTITIONS FOR AN 8×8 BOARD WITH 4 BLOCKERS

This table is a resource for the paper "Towards a Classification of Blocked Rectangular Grids and an Application to Finite Tiling Problems" by Noah Jensen and Stephanie Treneer. The example that generates this table is that of a game board composed of 8×8 square cells and with 4 blockers placed on the board. This table lists a board partition, defined in the referenced paper, K the subgroup of D_4, the symmetry group of a square, under which the board partition remains invariant, and each index $[D_4 : K]$. There are 8 entries.

Board partitions for a 8×8 board with 4 blockers

Board Partition	K	$[D_4 : K]$
(1,1,1,1,)	$\langle D_4 \rangle$	1
(2,0,2,0,)	$\langle D, D' \rangle$	2
(2,1,0,1,)	$\langle D \rangle$	4
(2,1,1,0,)	$\langle e \rangle$	8
(2,2,0,0,)	$\langle V \rangle$	4
(3,0,1,0,)	$\langle D \rangle$	4
(3,1,0,0,)	$\langle e \rangle$	8
(4,0,0,0,)	$\langle D \rangle$	4
